Skills

- HTML, CSS, Javascript, React, Tailwind CSS, Php CodeIgniter, Node JS, Express JS, MongoDB, SQL, Git

Projects

CneMeet

<https://github.com/ganeshArwat/CneMeet>

- Engineered CneMeet, a One-to-One Real-Time Communication web app utilizing React, Socket.IO, and WebRTC, enabling users to make video/audio calls, send in-call chat messages, and share screens directly in the browser.

CneDB Movie Search & Watchlist App

<https://cne-db.vercel.app/>

- Designed a React-based movie search and watchlist app that integrates with the OMDb API to fetch movie details by name.
- Enabled users to search for movies, view basic information, and add movies to a personal watchlist.
- Implemented localStorage to store the watchlist, ensuring persistence even after page refreshes.

Blind Assistant

<https://drive.google.com/file/d/1NTcEL3tTqp-5izQQNaRth6VAB6LwUkP-/view>

- Recognized among the top 100 innovative projects in Mumbai at the CIIA Competition.
- A complete navigation system based on low cost and physically unobtrusive sensors such as an Ultrasonic Sensor, Gps Module, Voice Assistant to control actions, Object Detection

Experience

PHP (CodeIgniter) Developer

May 2022 - Jul 2024

ITD Services Pvt. Ltd.

- Developed and maintained web application components using PHP and the CodeIgniter framework, enhancing functionality and user experience.
- Designed and implemented optimized database schemas and queries in MySQL, improving data storage and retrieval efficiency by 30%.
- Conducted thorough code reviews, debugging, and troubleshooting, ensuring software applications met quality standards and performance benchmarks.

Education

Mumbai University

2022

B.sc (information technology) in Information Technology | 9.45 CGPA

Secured First Rank in program

Certifications

- Meta Front-End Developer Professional Certificate
